Olumide Akinwumi - Frontend Engineer

akinwumiolumide5@gmail.com | LinkedIn | Personal website

PROFESSIONAL SUMMARY

Frontend Engineer with 3 years of development experience building scalable, user-centric web applications specializing in React,TypeScript and modern Javascript. I create clean,user-friendly interfaces with a focus on performance optimization and exceptional user experience, delivering high-quality solutions with a strong attention to code quality.

EXPERIENCE

Orokolabs Limited   **February 2023 – Present**
Frontend Engineer   Remote - Lagos,Nigeria

- Built a real-time financial dashboard that improved client decision-making and daily operations by 30%, using dynamic charts, tables, and API-driven reporting.
- Migrated legacy codebases to React and Next.js, resulting in a 50% improvement in page load speed and smoother user experience.
- Integrated third-party APIs to fetch and present financial data, reducing data processing overhead by 35% through optimized frontend logic.
- Implemented secure user authentication, including login and password reset, which reduced user-related support tickets by 30% through better UX and robust validation.
- Delivered a staggered loan repayment feature that helped reduce default rates by 20% by enabling flexible and transparent repayment scheduling.

PROJECTS EXPERIENCE

Omni Food-Food Delivery Website

- Built a responsive, modern storefront for seamless food ordering, which increased user conversion by 30% through clean layout and intuitive interactions.
- Connected real-time services like location, menu, and payment APIs to streamline ordering workflows and enhance user satisfaction.
- Boosted performance by 40% by optimizing image delivery, caching API responses, and implementing lazy loading for key UI components.
- Designed frictionless checkout and integrated Stripe for secure payments, contributing to a 15% increase in revenue through better payment flow and subscription support.
- Enabled one-click signup with Google OAuth 2.0, reducing signup friction and boosting first-time user login rates.

Home Hive - Property Rental Platform

- Developed a full-featured rental dashboard that improved operational decisions and boosted efficiency by 35%, simulating real-time analytics with dynamic UI.
- Modernized frontend using React and Next.js, improving speed by 60% and reducing bounce rates via faster load times.
- Delivered a responsive, accessible UI using Tailwind CSS, ensuring consistent cross-device performance.
- Secured the platform with full auth flows (login/logout/reset), which led to a 30% drop in support overhead from password issues.
- Streamlined CI/CD with GitHub Actions, reducing test environment issues by 45% through automated testing and deployment.
- Maintained code scalability using reusable components and clean coding practices, ensuring maintainability as the product scaled.

- **Coffee Cafe Website**

Frontend Engineer
- Designed and built a responsive marketing website end-to-end, improving local visibility and enhancing user engagement.
- Created scalable UI using reusable React components (e.g., for menu, contact, store locations), ensuring long-term maintainability.
- Rebuilt internal admin dashboard with Next.js, React Query, and Tailwind, cutting load times by 60% and improving user experience.
- Applied responsive design best practices, leading to a 25% boost in mobile traffic and engagement.

EDUCATION

Federal University of Petroleum Resources Effurun, Delta State

B.Sc, Geology   Delta State, Nigeria

OTHER

- **Technical Skills**: Javascript, Typescript, React, NextJS, Vite, Tailwind CSS, ShadCN, Radix UI, Material UI, NodeJS, Git, React Testing Library.
- **Soft Skills**: Excellent communication, attention to detail, kindness, excellence, independence, growth mindset, and decision-making.
- **Languages**: English (native).
